Make these pages yours

Meet twenty different creatures. Look at their shapes, choose your colours, and enjoy each page at your own pace.

Printing

Use the A4 edition for A4 paper. Print at actual size, one-sided if you are using markers. Place a spare sheet underneath to protect the table and the next page.

Your colour choices

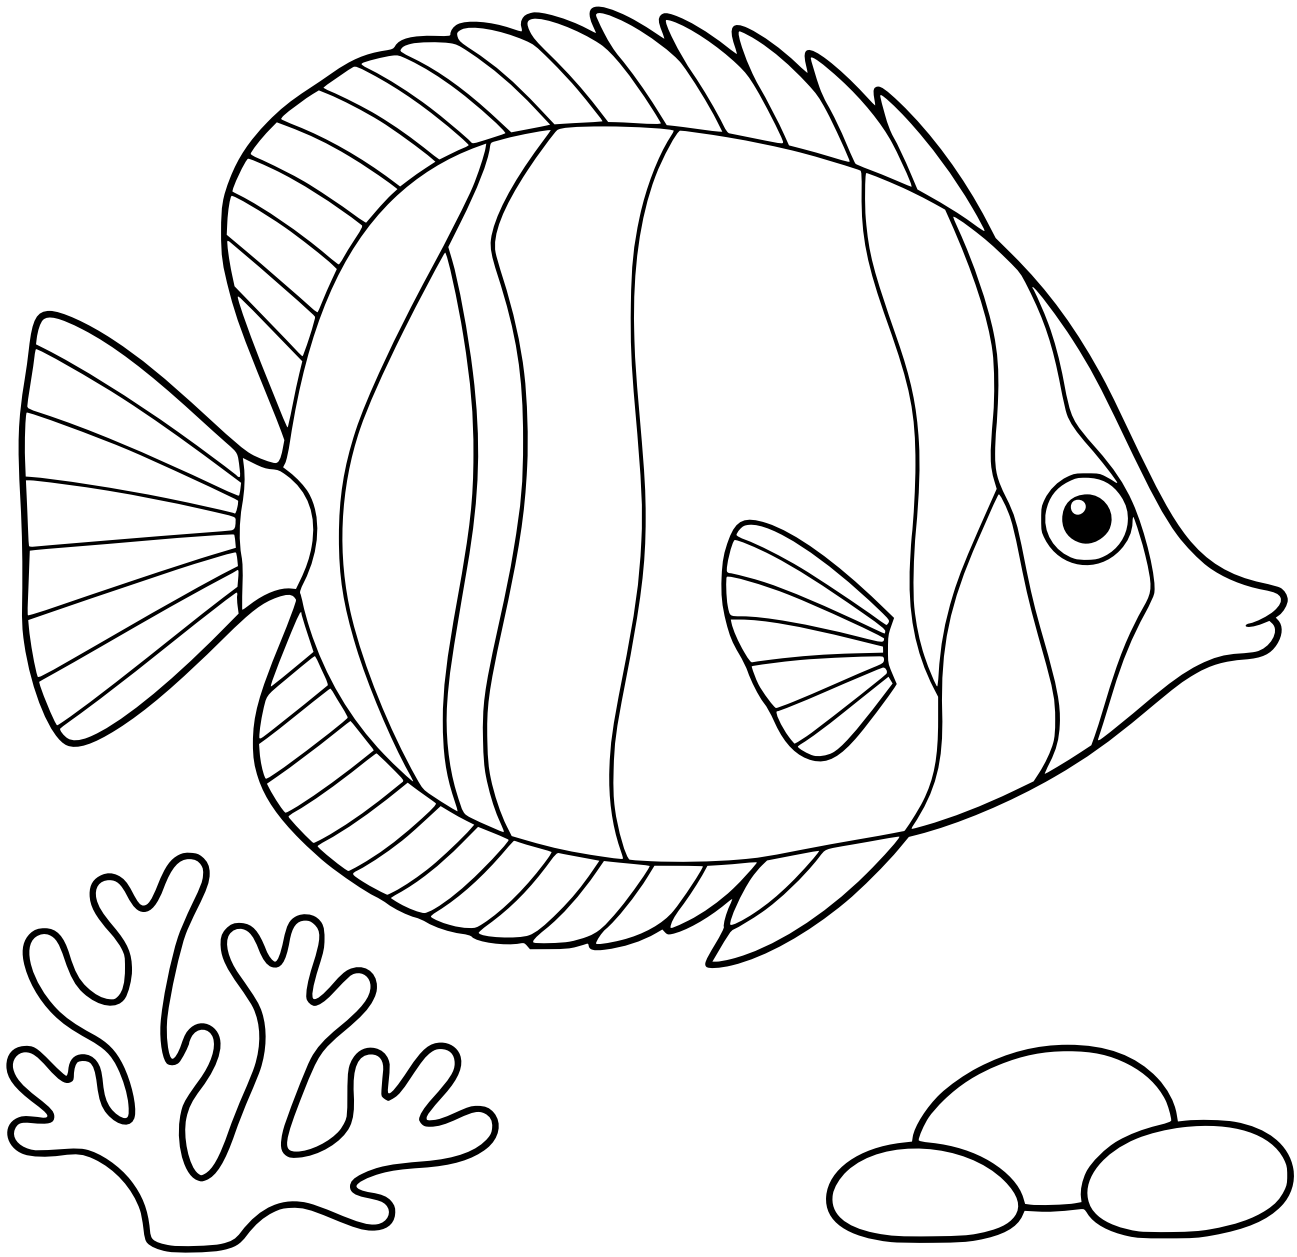
The separate colour guide uses the same outlines with flat fills. Keep it on screen or print only the pages you want. It is an example, not a set of correct answers. Real creatures can have many different colours and patterns.

Drawing pages

Two open-ended drawing pages at the back are yours to invent. Younger colourists can start with the larger shapes; grown-ups can help with smaller details.

For one household or one educator's own noncommercial classroom or small group. Print reasonable copies for that use. Please do not resell or distribute these files.

Butterflyfish



Follow the broad bands across the fish.

Picture 01 of 20

A place to explore

Draw a place where your favourite creature could move, rest, and find shelter. Add big shapes for someone else to colour.
